

Bio for Thomas P. Nolan Jr.

I am a candidate for re-election as the Nominating Committee Chair of the Biophysical Agents Special Interest Group. I have been an APTA member since 1977, and I am one of the founding members of the BPA SIG. I am a professor of physical therapy at Stockton University where I teach students the appropriate and effective use of biophysical agents. My current research is investigating the clinical effectiveness of neuromuscular electrical stimulation for muscle strengthening. If re-elected to this position I will recruit SIG members to be candidates for SIG officer elections. I believe I can be an effective Nominating Committee Chair based on my past success at this position and my contact with many colleagues in physical therapy, in particular colleagues who are interested in maintaining biophysical agents as an integral part of physical therapy practice.
