## **Letter from the Editor-in-Chief**

It is with great enthusiasm that I welcome you to the third volume of the Journal of Clinical Electrophysiology and Wound Management (JCEWM). Following the success of our previous issues, I am deeply honored to continue serving as the Editor-in-Chief of this dynamic journal, which serves as a cornerstone for advancing the fields of electrodiagnostics, wound management, biophysical agents, and neuromusculoskeletal ultrasonography.

Our commitment to delivering high-quality, peer-reviewed content remains steadfast. As we release this third volume, our mission remains clear: to be a trusted resource for clinicians, educators, and researchers dedicated to these critical areas of practice.

The journal continues to play a pivotal role within the Academy of Clinical Electrophysiology and Wound Management (ACEWM), a vital component of the American Physical Therapy Association (APTA). By providing a dedicated platform for sharing research and clinical evidence, JCEWM supports the academy's commitment to fostering excellence in its four specialty areas and its two ABPTS board certifications.

We extend our deepest gratitude to the ACEWM board for their enduring support and vision, which has been instrumental in the journal's growth and success. Our sincere appreciation also goes to the dedicated reviewers whose expertise, time, and constructive feedback ensure the quality and rigor of the articles we publish. Their contributions are invaluable in maintaining the journal's high standards.

As we look to the future, we are excited about the opportunities that lie ahead. We encourage all professionals in the fields of electrodiagnostics, wound management, biophysical agents, and neuromusculoskeletal ultrasonography to actively engage with the journal. Whether by submitting your research, serving as a reviewer, or sharing our work within your professional circles, your involvement is essential to the ongoing success and impact of JCEWM.

I look forward to your valuable contributions as we work together to advance knowledge and practice in these vital areas.

Warm regards,

Mohini Rawat PT, DPT, ECS, OCS, RMSK

Editor-in-Chief

Journal of Clinical Electrophysiology & Wound Management.
